DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12, drawn to a financial management system . . . and a client terminal having a financial management program, classified in class 705, subclass 39.
 - II. Claims 13-15, drawn to a financial management system . . . and a wireless terminal device, classified in class 705, subclass 36.
 - III. Claim 16, drawn to a financial management system . . . and a scripting agent, classified in class 705, subclass 1.
2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because a terminal device does not require a financial management program. The subcombination has separate utility such as monitoring inventory and accounts payable/receivable.
3. Inventions I and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant

case, the combination as claimed does not require the particulars of the subcombination as claimed because a scripting agent is not needed. The subcombination has separate utility such as monitoring inventory and accounts payable/receivable.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or Group III, restriction for examination purposes as indicated is proper.

6. A telephone call was made to Matthew G. Dyor (Reg. No. 45,278) on August 26, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made. Mr. Dyor requested the Office Action be sent via the mail.

7. Applicant's Information Disclosure Statement was received on January 3, 2003 and will be reviewed in due course.

Conclusion

8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
